

# OMKAR SANTOSH GUTAL

📍 Pune, Maharashtra, India — 📞 +91-9373831167 — ✉ gutalomkar01@gmail.com — in Omkar Gutral

## PROFESSIONAL SUMMARY

Results-driven Data Scientist with 1+ year 6 months of experience building end-to-end ML solutions, including predictive modeling, classification, and data mining. Proficient in Python and SQL, with hands-on experience in Regression, Decision Trees, Random Forests, and Neural Networks. Strong at translating business requirements into scalable, data-driven solutions and collaborating with stakeholders to drive actionable insights.

## TECHNICAL SKILLS

**Programming:** Python, SQL, R

**Core ML:** Supervised Learning, Classification, Regression, Model Evaluation, Feature Engineering, Neural Networks, TensorFlow, PyTorch

**Generative AI:** Prompt Engineering, RAG, LangChain, Transformers, Vector Databases (FAISS)

**Data & NLP:** Pandas, NumPy, Text Processing, Tokenization, Embeddings

**Deployment & MLOps:** FastAPI, MLflow, CI/CD (GitHub Actions), Docker

**Cloud:** AWS (S3, EC2 Basics), Azure

## PROFESSIONAL EXPERIENCE

### Data Scientist Intern - Ai Variant, Bengaluru

Dec 2025 – Present (6 months)

- Built and optimized machine learning models for time series forecasting, anomaly detection, and predictive analytics, improving performance through feature engineering and hyperparameter tuning.
- Extracted, cleaned, and transformed large datasets using Python and SQL, ensuring data quality through validation.
- Developed end-to-end data science workflows including data preprocessing, feature engineering, model training, and evaluation, ensuring scalable and reproducible solutions.
- Evaluated models using RMSE, MAE, precision-recall, and cross-validation, and improved performance through hyperparameter tuning and model selection techniques.

### Product Development Engineer - Philips, Pune

Aug 2024 - Jul 2025 (11 months)

- Worked on Python-based automation, managed product-related data, and created as well as maintained documentation for Philips products.
- Collaborated with global teams to customize the Windchill PLM tool, improving release accuracy by **20%**, and handled translation validation along with multilingual UI testing.
- Served as Product Data Owner for three major product launches.

## PROJECTS

### Behavioral Customer Segmentation & Prediction System

- Built an end-to-end customer segmentation pipeline using K-Means, Hierarchical, and DBSCAN, selecting the optimal model via Silhouette Score.
- Defined 4 customer personas and trained a Logistic Regression model for real-time prediction.
- Deployed a FastAPI application for scalable inference and interactive customer segment visualization.

### GPT Mini Studio

- Built a personalized GenAI platform using Python & FastAPI for prompt-based generation with lightweight LLMs.
- Designed & deployed RESTful APIs with authentication, rate limiting(credit-based), and session history management.
- Implemented a RAG pipeline using embeddings and FAISS-based vector search for context-aware response generation.

### DysarthriaCare (SpeechEase)

- Built an AI-powered speech assistance system for dysarthria using audio processing and machine learning to improve speech clarity and intelligibility.
- Engineered speech feature extraction and pattern recognition pipelines to detect articulation errors and generate assistive outputs for impaired speech.

## CERTIFICATIONS

- NASSCOM - Certificate Program in Data Science & Machine Learning
- Oracle University - OCI AI Foundations Associate

## EDUCATION

### Bachelor Of Engineering in ECE

Savitribai Phule Pune University

2021 - 2025

first class with distinction - 7.62/10
